PRINCIPLES OF DESIGN

Variety Through Contrast Definition: When different elements are placed side-by-side, they create contrast. Description: The contrast between the different elements creates a sense of movement and interest.	Unity Through Repetition Definition: When an element is repeated, it creates a sense of unity. Description: The repeated element creates a sense of rhythm and balance.	Balance: Symmetrical Definition: When a design is divided into two equal halves, it creates a sense of balance. Description: The symmetrical design creates a sense of stability and order.	Balance: Asymmetrical Definition: When a design is divided into two unequal halves, it creates a sense of balance. Description: The asymmetrical design creates a sense of movement and interest.
Balance: Radial Definition: When a design is divided into equal parts around a central point, it creates a sense of balance. Description: The radial design creates a sense of harmony and unity.	Balance: Visual Definition: When a design is divided into two unequal halves, it creates a sense of balance. Description: The visual balance creates a sense of movement and interest.	Proportional Relationship Definition: When a design is divided into parts that are in proportion, it creates a sense of balance. Description: The proportional relationship creates a sense of harmony and unity.	Scale Relationship Definition: When a design is divided into parts that are in scale, it creates a sense of balance. Description: The scale relationship creates a sense of movement and interest.
Structural Elements Creating Rhythm Definition: When a design is divided into parts that are in rhythm, it creates a sense of balance. Description: The structural elements create a sense of movement and interest.	Rhythm Through Repetition Definition: When a design is divided into parts that are in rhythm, it creates a sense of balance. Description: The repetition creates a sense of harmony and unity.	Emphasis Through the Use of Color Definition: When a design is divided into parts that are in emphasis, it creates a sense of balance. Description: The use of color creates a sense of movement and interest.	Emphasis Through the Use of Size Definition: When a design is divided into parts that are in emphasis, it creates a sense of balance. Description: The use of size creates a sense of movement and interest.
Emphasis Through the Use of Value Definition: When a design is divided into parts that are in emphasis, it creates a sense of balance. Description: The use of value creates a sense of movement and interest.	Emphasis Through the Use of Anomaly Definition: When a design is divided into parts that are in emphasis, it creates a sense of balance. Description: The use of anomaly creates a sense of movement and interest.	Harmony Definition: When a design is divided into parts that are in harmony, it creates a sense of balance. Description: The harmony creates a sense of movement and interest.
